

# Touch Bar Panic Exit Hardware - Electronic Actuator

## AEB800

### Microswitch Touchbar

Electronic actuator for use in Panic applications. The actuator provides touch bar operation across the door width which activates an electronic locking device.

- Designed to fully comply with prEN13637 for electrical panic & emergency exit systems
- Can be cut down on site suitable for doors up to 1240mm wide
- Minimum unit width 660mm
- Ideally used in conjunction with face to face electromagnets (please contact us for further information on these and other suitable locking devices)
- Suitable for single doors, rebated or non-rebated double doors
- Dual switching for lock activation and monitoring
- Operates 12v or 24v DC Max. 5 Amp

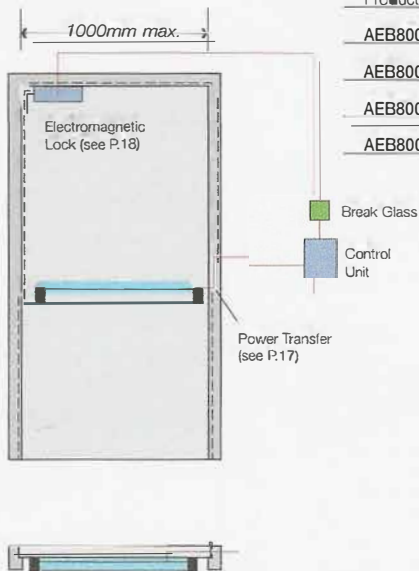

#### Finishes

SAA Satin anodised aluminium

Powder coated colours in Blue, Green and Red available to order.
