

APT080-20 Intelligent Auto Tracking Wi-Fi Camera

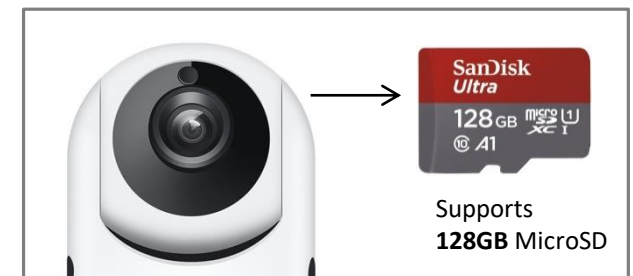

The APT080-20 intelligent auto tracking Wi-Fi camera, with clear two way audio and day and night monitoring.

The camera has a motion detector, which can be used for home or office security, to check on warehouse movements, night time monitoring or non occupied rooms. For the home you can monitor rooms and even check on the children at night.

The unit is incredibly easy to install and just requires a Wi-Fi connection. The unit is supplied with plug in power adapter and a mini USB cable.
